

CLQ (Academic Poster) Grading Criteria

The University of Essex Online – Undergraduate Grading Criteria NQF Level 5.

(Each assessment specific marking criteria will be developed using the standard criteria below. The weighting for each element within the table may vary between assessments).

Criteria	80-100% (Exceptional - 1st)	70-79% (1 st)	60-69% (2:1)	50-59% (2:2)	40-49% (3rd)	30-39% (Marginal Fail)	20-30% (Fail)	20%> (Fail)
Knowledge and understanding of the subject area / conceptual issues under consideration. Demonstrable understanding of course materials and their relevance to the assessment. Weighting: 30%	High quality work showing detailed faultless knowledge and understanding of the established concepts, principles and theories. Demonstrates a sound awareness of the strengths and weaknesses of the knowledge base.	High quality work showing detailed knowledge and understanding of the established concepts, principles and theories. Demonstrates some early awareness of the strengths and weaknesses of the knowledge base.	Work of solid quality showing competent and consistent understanding of the established concepts and principles of the subject(s).	Adequate work showing understanding of the established concepts and principles of the subject(s) but lacking depth and breadth.	Simple factual approach showing limited understanding of the established concepts and principles of the subject(s). Narrow or misguided selection of course material, with elements missing or inaccurate.	Weak work showing limited but fragmentary understanding of the established concepts and principles of the subject(s), for example through inaccuracies, inclusion of irrelevant course material and/or absence of appropriate information.	Unsatisfactory work showing weak and flawed understanding of the established concepts and principles of the subject(s), for example through serious inaccuracies, inclusion of a significant amount of irrelevant course material and/or absence of appropriate information.	Highly unsatisfactory work showing major gaps in understanding of the established concepts and principles of the subject(s). Inclusion of largely irrelevant course material, absence of appropriate information and significant inaccuracies.
Critical Analysis and Evaluation Students should demonstrate their intellectual skills at the	Use of excellent critical, analytical and evaluative skills in order to develop highly logical and coherent	Use of excellent critical, analytical and evaluative skills in order to develop highly logical and coherent	Use of sound critical, analytical and evaluative skills in order to develop logical and coherent	Evidence of use of evaluation and critical analysis to support the development of logical and	Limited and inconsistent use of evaluation and critical analysis to support emerging judgements or	Largely descriptive work, with very little effort made to use evaluation and critical analysis to	Descriptive work with no effort made to use evaluation or critical analysis to develop judgements or arguments.	Work is largely irrelevant or inaccurate, characterised by descriptive text and

appropriate level of their study. Weighting: 20%	judgements / arguments, supported by a range of relevant evidence. Strong evidence of independent thinking and creativity. Explicit discussion of a range of viewpoints with strong awareness of the limits of their knowledge.	judgements / arguments, supported by a range of relevant evidence. Some, perhaps limited, evidence of independent thinking and creativity. Some discussion of other viewpoints and an awareness of the limits of their knowledge.	judgements / arguments, supported by relevant evidence. Some evidence of originality. Demonstrates a sound awareness of other viewpoints and a good awareness of the limits of their knowledge.	coherent judgements / arguments, supported by relevant evidence. An awareness of other viewpoints and of the limits of their knowledge.	arguments, although not always logical or coherent and with inaccuracies. Limited awareness of other viewpoints and the limits of their knowledge.	develop judgements or arguments. Information accepted uncritically, with unsubstantiated opinions evident.	Views expressed are often illogical, invalid or irrelevant. Minimal or no use of evidence to support views.	unsubstantiated generalisations. Minimal or no use of evidence to support views.
Communication Initial Post made during the first week, with Peer Responses made throughout the two-week activity. Up to five informal posts can be made. Academic Poster should communicate information well (e.g. using short sentences or bullet points), and successfully promote a behavioural change. Executive Summary should explain how students have applied theory, and how they	Communication is highly effective and relevant for the situation, audience and degree of complexity. Communication is insightful, reflective and adds value throughout the piece of work. Communication provides exceptional leadership and coherence to peers.	Communication is competent and relevant for the situation, audience and degree of complexity. Communication is insightful, reflective and adds value to the piece of work. Communication provides some leadership and coherence to peers.	Communication is appropriate and relevant for the situation, audience and degree of complexity. Communication is insightful, reflective and adds value to the piece of work. Communication provides direction and coherence to peers.	Communication is mostly appropriate and relevant for the situation, audience and degree of complexity. Communication may be insightful, reflective and add value in places but not consistently.	Communication demonstrates some appropriateness and relevance for the situation, audience and degree of complexity. Communication has more limited insightful, reflective elements	Communication demonstrates limited appropriateness and relevance for the situation, audience and degree of complexity. Communication has very few insightful, reflective elements	Communication demonstrates very limited appropriateness and relevance for the situation, audience and degree of complexity. Communication has no insightful, reflective elements. Communication lacks coherence to peers and may be confusing.	communication demonstrates no or appropriateness and relevance for the situation, audience and degree of complexity. Communication has no insightful, reflective elements. Communication has no coherence to peers and /or is very confusing.

have used research to inform the health promotion messages in their poster. Weighting: 20%				Communication is coherent to peers.	Communication is mostly coherent to peers.	Communication lacks coherence to peers.		
Reading and Referencing The majority of the reading will be from journal articles and course textbooks, with evidence of some wider reading beyond materials recommended on the platform. Weighting: 20%	Critical engagement with a wide range of relevant reading/source material, including research-informed literature where relevant. Begins to demonstrate foundations of original thought. Consistently accurate application of referencing with no errors.	Critical engagement with a wide range of relevant reading, including research-informed literature where relevant. Consistently accurate application of referencing.	Engagement with a wide range of relevant reading/source material. Sound application of referencing, with no inaccuracies or inconsistencies.	Engagement with an appropriate range of reading/source materials beyond essential texts. Referencing may show minor inaccuracies or inconsistencies.	Evidence of reading, largely limited to essential texts, but mainly reliant on taught elements of the module. Referencing may show inaccuracies and/or inconsistencies.	Poor engagement with essential texts and no evidence of wider reading. Heavily reliant on taught elements of the module. Inconsistent and weak use of referencing.	Limited evidence of reading and/or reliance on inappropriate sources. Limited engagement with taught elements of the module. Very poor use of referencing.	No evidence of reading or engagement with taught elements of the module. Non-existent or incoherent referencing.
Presentation Style and Structure Presentation includes how creative, engaging and informative the Poster is. Also includes how well presented and structured	Compelling presentation of work that is appropriately and coherently structured and clearly articulated throughout. Accurate use of an Academic Writing style. No errors in	Compelling presentation of work that is appropriately and coherently structured and clearly articulated throughout. Accurate use of an Academic Writing style. Accurate grammar,	Competent presentation of work in terms of structure and articulation of ideas. Appropriate academic writing style adopted. Grammar,	Work is structured in a coherent manner and is mostly clearly articulated. Some attempt to adopt an academic writing style. Grammar,	Acceptable presentation in which relevant ideas / concepts are reasonably articulated. Academic writing style may be weak in some areas, Grammar,	Work is loosely, and at times incoherently, structured, with information and ideas mostly poorly articulated. Academic writing style poor. Grammar, spelling	Work is poorly presented in a disjointed and incoherent manner. Concepts, theories and ideas are very poorly articulated, weak English and/or inappropriate writing style, multiple	Work is extremely disorganised, with much of the content is articulated in a confusing way. Very poor English and/or very inappropriate style of writing. Multiple
